

# AFFINITY REALTY

## Project Details & Working Breakdown

Website Workflow • UI/UX Analysis • Blue & White Design Theme • Lead Generation Process

|               |                                                                |
|---------------|----------------------------------------------------------------|
| Project Type  | Real Estate Business Website                                   |
| Primary Goal  | Showcase projects and convert visitors into customer enquiries |
| Main Journey  | Explore → View → Enquire → Follow-up → Site Visit → Conversion |
| Updated Theme | Blue + White, clean, modern and professional                   |

Prepared as a complete website project documentation summary

# 1. Project Overview

**Affinity Realty** is a real estate website designed to present company information, property projects, services, gallery content, referral information and enquiry/contact options. The core business objective is to help visitors discover properties and become qualified sales leads.

**Main website modules:** Home, Projects, Services, Gallery, About Us, Referral, Contact Us and Login.

## 2. Complete Website Workflow

## 3. Home Page Breakdown

**Header & Navigation:** Provides access to the main sections and important user actions.

**Hero Section:** Introduces the real estate brand, key message and primary call-to-action buttons.

**Project Categories:** Helps visitors understand available property categories such as plots, residential and commercial developments.

**Featured Projects:** Highlights selected properties and directs users toward detailed project information.

**Services & Trust Sections:** Explains business offerings and strengthens customer confidence.

**Contact & Enquiry CTAs:** Creates multiple opportunities for visitors to contact the company.

## 4. Projects Module

The Projects section is the primary discovery area of the website.

**Projects Page → Browse Projects → View Project Cards → Select Project → View Details → Check Images / Location / Property Information → Enquire**

### Typical project information includes:

- Project Name
- Project Status
- Location
- Project Type
- Project Images
- Property Details
- View Details CTA
- Enquiry Option

## 5. Services Module

The services area communicates the company's real estate development capabilities and helps establish trust before a visitor submits an enquiry.

**Land Development → Plotting Development → Residential Development → Commercial Development → Construction & Development**

## 6. Gallery Module

**User Opens Gallery → Images Load → User Selects Image → Image Viewer / Larger View → Continue Browsing**

## 7. About & Referral Modules

**About Us:** Communicates the company story, experience, values, quality, transparency and development vision.

**Referral:** Provides an additional business channel where opportunities or customer referrals can be submitted and tracked.

## 8. Inquiry & Lead Generation Working

This is the most important conversion workflow because it connects website traffic with the sales process.

## Business Conversion Model

**Website Visitor → Potential Customer → Lead → Sales Follow-up → Site Visit → Booking / Conversion**

## 9. Admin Workflow

**BOOKING / CLOSED DEAL**

## 10. Updated UI Theme: Blue & White

The updated design direction uses **Blue + White** as the main visual identity. This gives the website a professional, trustworthy, modern and clean appearance suitable for a real estate brand.

| Color Role   | Color            | Hex Code | Recommended Use                         |
|--------------|------------------|----------|-----------------------------------------|
| Primary Navy | Navy Blue        | #0B3D91  | Main headings, brand emphasis, footer   |
| Primary Blue | Royal Blue       | #1565C0  | Buttons, links, active states, icons    |
| Light Blue   | Soft Blue        | #EAF3FF  | Cards, section backgrounds, hover areas |
| White        | White            | #FFFFFF  | Main background and content areas       |
| Dark Text    | Charcoal         | #1F2937  | Body text and strong readable content   |
| Border       | Soft Blue Border | #BFD7F2  | Cards, forms and separators             |

### Color Psychology

- **Blue:** Trust, professionalism, stability and confidence.
- **White:** Cleanliness, simplicity, clarity and modern design.
- **Light Blue:** Soft visual separation without making the interface feel heavy.
- **Navy:** Strong brand presence and premium corporate appearance.

## 11. Font & Typography System

Recommended font direction: a modern sans-serif family such as **Poppins, Inter or Montserrat**. The typography should remain clean, readable and consistent across desktop and mobile.

| Element             | Recommended Size | Weight / Style  |
|---------------------|------------------|-----------------|
| Hero Heading        | 48–64 px         | Bold / 700      |
| Section Heading     | 32–42 px         | Semi-Bold / 600 |
| Project Title       | 20–24 px         | Semi-Bold / 600 |
| Navigation          | 14–16 px         | Medium / 500    |
| Body Text           | 15–17 px         | Regular / 400   |
| Mobile Main Heading | 30–40 px         | Bold / 600–700  |

## 12. UI Design Breakdown

**Header UI:** Clean logo placement, simple navigation, visible contact/enquiry actions and responsive mobile menu.

**Hero UI:** Strong headline, supporting text and clear CTA buttons such as Explore Projects and Enquire Now.

**Project Cards:** Image-first layout with project name, location, status/type and a clear View Details button.

**Inquiry Form:** Simple fields with clear labels and a prominent Submit button. Keep validation messages easy to understand.

**Buttons & CTAs:** Use blue as the primary action color, white text on important buttons and consistent hover/focus states.

**Cards & Sections:** Use white cards on white or light-blue backgrounds with subtle borders, rounded corners and sufficient spacing.

## 13. UX Breakdown

- **Clear Navigation:** Users should quickly understand where to find projects, services, gallery and company information.
- **Simple Property Discovery:** The shortest journey should be Homepage → Projects → Project Details → Enquiry.
- **Strong Calls-to-Action:** Use consistent CTA wording such as Explore Projects, View Details, Enquire Now and Contact Us.
- **Trust Building:** Show company information, project details, visuals and clear contact options before requesting customer details.
- **Reduced Friction:** Keep the enquiry form short and avoid unnecessary fields.
- **Feedback:** After submission, provide a clear success message so users know their enquiry was received.

## 14. Responsive & Mobile UX

| Desktop              | Mobile                                |
|----------------------|---------------------------------------|
| Full navigation menu | Hamburger / compact navigation        |
| Multi-column layouts | Single-column layouts                 |
| Large hero content   | Reduced hero text size                |
| Project grid         | Stacked project cards                 |
| Inline CTA buttons   | Easy-to-tap buttons, often full width |

**Mobile recommendations:** minimum 44px touch targets, readable font sizes, optimized images, reduced section padding, no horizontal scrolling and easy form input interaction.

## 15. Recommended System Architecture

### FRONTEND

HTML + CSS + JAVASCRIPT

WEBSITE UI

PROJECT / CONTENT DATA

BACKEND + DATABASE

PROJECT MANAGEMENT

INQUIRY MANAGEMENT

CUSTOMER LEADS

GALLERY MANAGEMENT

ADMIN MANAGEMENT

ADMIN DASHBOARD

SALES TEAM

## 16. Overall Design System

**Style:** Modern • Professional • Clean • Trustworthy • Real-Estate Focused

**Theme:** Navy Blue + Primary Blue + Light Blue + White

**Main Goal:** Convert website visitors into qualified property leads

## 17. Final Project Summary

USER VISITS WEBSITE

EXPLORES COMPANY

BROWSES PROJECTS

SELECTS PROPERTY

VIEWS DETAILS

SHOWS INTEREST

SUBMITS INQUIRY

ADMIN / SALES TEAM RECEIVES LEAD

CUSTOMER FOLLOW-UP

SITE VISIT / MEETING

BOOKING / CONVERSION

The complete product strategy can be summarized as: **Explore** → **View** → **Enquire** → **Follow-up** → **Convert**. The updated blue and white visual system supports a clean, professional and trustworthy user experience while keeping the enquiry journey prominent.
